

31 October 2022

42 Rathgar Road
Henderson
Auckland 0610

Dear Resident,

We are completing some electrical work in your area

Vector owns and operates networks that distribute electricity and gas across the greater Auckland region. We are constantly working to ensure safety and reliability of our networks.

The purpose of this letter is to provide you with more information about an upcoming Vector electricity connection and how it could potentially impact you, given your property's proximity to the work site.

The work will be carried out by our contractor Electrix between 14th November to 5th December 2022 outside 55 Rathgar Road, Henderson. Please see attached site plan.

Scope of works:

- **Temporary Traffic Management** will be established around the worksite to ensure safety to pedestrians in the area.
- Some **excavation work** to install cabling underground in the road reserve outside this property.
- **Work hours and noise** – most of the work will take place between 8am-3.30pm with low to medium noise at intermittent periods.

Every effort will be made to ensure disruption is kept to a minimum.

Thank you for your patience while we complete this work and apologise for any inconvenience it may cause you. If you have any questions, please contact Electrix on 09 448 1701.

Kind regards,

Vector Customer Service
