Textiles Technology			30	30	30
Design & Visual Communication	-	-	-	20	30

Fees and Costs 2023

The school's Board of Trustees has decided to again take part in the NZ Government's Donations Scheme. This scheme has been set up to lower the cost of education to families.

Course Costs

As a result, in 2023 we will only be asking families to meet course material costs where there is a take home component. These are shown above. This will result in considerable savings for you and your family.

Course workbooks and online learning programs will also now be funded by the school where these items are an expectation for the whole class. Students will need to purchase their own optional revision guides.

Trips & Camps

The costs of day trips that are a core part of the curriculum will now also be covered by the school. Optional and overnight camps will still need to be paid for by families as and when the camp runs.

Extra-curricular Activities

Students and families will still be expected to meet the costs for sports, arts and cultural activities.
